

## Compliance with the Building Code 2016

Information about the requirements of the Building Code will be communicated to the team and employees prior to mobilisation to site. Employees will be advised of the application of the Building Code and requirement to comply with its content and objectives through the induction and onboarding process.

In accordance with Section 17 of the Building Code 2016, League Engineering will notify the ABCC of a breach or suspected breach as soon as practicable, but no later than two working days after becoming aware of the breach or suspected breach. League Engineering will also advise the ABCC at this time of the steps proposed to rectify the breach.

When 1 or both of the League Management team conducts a site visit, we also conduct a site review, including viewing amenities to ensure they meet the requirements of the Code and are at industry best practice levels. Should we identify any area of potential noncompliance, we take the necessary steps, including staff realignment with policy or inform the host client of the potential breach and their respective obligations.

After notification, League Engineering will, within 14 days, notify the ABCC of what steps have been taken to rectify that breach.

League Engineering will ensure all relevant staff are aware of the requirements of this WRMP.

League Engineering will ensure that a copy of this WRMP is kept on our website and is readily available for any employee to view.

League Engineering will regularly (at least biannually) audit our compliance with the Code and this WRMP.

League Engineering will promote compliance with the Code and the WRMP at site inspections.
